

ENGIE

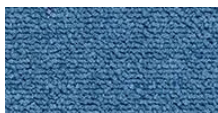

A creative combination of colourways from Forbo Flooring Systems' Tessera Layout and Outline carpet tile ranges have been installed throughout the newly refurbished ENGIE offices in Rotherham, turning the two-storey space into a bright and re-energised workplace. Energy, services and regeneration specialist, ENGIE, enlisted the help of Julie Poulter Interior Design (JPID) to transform its offices into a contemporary and collaborative working environment, which needed to reflect the company's brand and colour palette, while adhering to its brand values. The creativity of the ENGIE flooring scheme has led to the project being awarded Commended in the Fly Forbo 2018/2019 competition.
