

**Entreprise BEB, Plérin**

The architect in charge of the "BeB Enterprise" project trusted Forbo Flooring Systems to choose the flooring. She turned to the Flotex range, a flocked textile flooring known for its acoustic properties, walking comfort and ease of maintenance. The proposed Flotex Lab service allows you to create a custom flooring that is suitable for its establishment. Créa' Flotex offers high-definition printing, tailored to create a unique location.
