

Espai Infantil

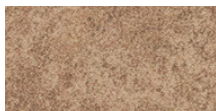

In the Pare Manyanet les Corts juvenile schools, represented in Greece, Rome and Barcelona, we have installed the revolutionary Flotex textile flooring. Our Greek designs capture the grandeur of antiquity with authentic patterns and colors. In Rome, classic elements and warm tones take us to the golden age of empire. And in Barcelona, we fuse the city's vibrant modernity with vivid colors and contemporary patterns. Forbo's Flotex flocked flooring is not just beautiful but practical and functional, combining the softness of a carpet with the durability and cleanability of a resilient floor. The flocked flooring structure improves indoor air quality by retaining dust and particles and improving indoor air quality. The resulting healthy environment promotes creativity, learning and well-being. Immerse yourself in the magic of Flotex on this exciting journey through the Mediterranean!

Location	Barcelona
Architect	Joan Torres
