

Estudio Helper Marketing y Expansion

Helper Marketing y Expansión are more than just space designers. Helper is the piece of gear that every company and entrepreneur needs to develop their business idea: in everything related to the point of sale, we offer specialized advice at every stage of the project, and support during its implementation and subsequent expansion. Helper designed its studio to show the best they can offer. And Forbo products, especially the collection Tessera Struktur 1 fit perfectly with this goal. The job done during the whole selection process was done in a close relationship with the Forbo team.
