

**Eureka! The National Children’s Museum**

Eureka! The National Children’s Museum recently redeveloped its largest gallery to provide a playful and open environment for its energetic young visitors. Created using the water cutting technology Aquajet, Forbo’s Marmoleum was specified in a large variety of shades to inject a shot of playful colour into the gallery’s floor. A combination of bright colours from Forbo’s Marmoleum sheet and tile collections, including colourways including a vibrant grassy green, were installed in the new ‘All About Me’ gallery which has attracted over 245,000 visitors.
