

Eurofins Office

In the new EUROFINS office in Katowice, Poland, Forbo Allura Wood LVT panels in herringbone shape have been installed. This floor adds elegance and style to the room. Allura LVT panels are durable and easy to maintain, which makes them a perfect flooring solution not only in the office areas, but also in the hallways, kitchen and canteen. The kitchen was fitted with PVC Eternal floor covering with a geometric pattern according to the customer's design. In the toilets the PCV safety flooring Forbo Step was chosen.
