

Family Entertainment Center

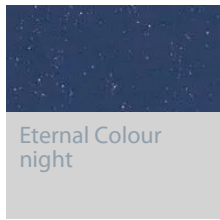

The Family Entertainment Center is a playful, multidimensional, and multicoloured universe featuring mechanical equipment, playgrounds, electronic games, a cafeteria, restrooms, and private party areas. The park's themes range from the ocean floor to outer space, representing the five elements of creation: water, earth, fire, air, and ether – all brought to life through organic interior design. The six party rooms on the upper floor form a village of small houses, creating a homely ambiance where guests can celebrate as if in their own living rooms. The vibrant flooring, made from 24 different vinyl colours, climbs up walls and parapets to improve durability and maintenance. Forbo Flooring products were chosen for their quality, finish, and wide colour range, enabling the creation of this enchanting space.

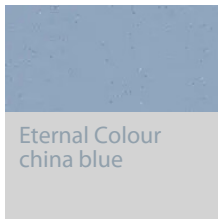

Location	Santo André, Brasil
General Contractor	Playcenter
Architect	Diogo Freitas and Matheus Martini
Installation by	Archfloor
Floor Designer	Matheus Martini
