

French Ski Federation

The French Ski Federation inaugurated its new headquarters in March 2024. Flotex planks and its refract topaz decor were installed in the buildings over a surface area of 1,200 m2. Offices were installed as well as a large amphitheater for conferences. Flotex's technical performance and acoustic qualities make it possible to welcome big events with heavy traffic, while ensuring acoustic comfort.

Nome del progetto: Fédération Française de Ski

Architetto: AER Architectes
