

Furniture Clinic

Colours inspired by the natural environment, combined with the outstanding performance of Forbo Flooring Systems' luxury vinyl tile (LVT) and carpet tile solutions, have helped AMH Workspace create an uplifting working environment for Furniture Clinic's new HQ, which 'brings the outdoors indoors'. AMH Workspace was brought on board by Furniture Clinic as part of the refurbishment project to create a warm and welcoming new HQ for the company's 65 employees. With wood being an integral part of the business, it naturally features prominently both on the external façade of the building and internally. A striking feature of the new 50,000 sq ft premises is the atrium area with a cedar slat wall covered with natural moss that catches the eye as soon as you enter the building. Full floor to ceiling height windows and a balcony area with open walkways completes the visual spectacle and have transformed the entrance area into a bright, welcoming and memorable space. "Using Forbo's Allura Flex LVT flooring in Brown Raw Timber in the ground floor reception area adds warmth to such a vast space," explained Heather. Available in 34 wood designs, Allura Flex comes in 4 different plank sizes, offering greater design freedom. The matte surface features a natural looking fine wood grain with a true to life embossing, while the tile's special backing is designed for comfort and improved impact sound reduction. This has helped to control the noise in the expansive reception area. Heather continued: "We chose Allura Flex for its natural looking characteristics. The extra-large 150 x 28 cm planks were perfect for such a large space, while the 5mm thickness and 1mm wear layer offers exceptional performance, making it the ideal solution for this high traffic area." Forbo's Tessera Cloudscape carpet tiles in the green hues of Monsoon Cloud and Summer Storm have been used throughout the offices and meeting rooms. In the open office area, Cloudscape has been installed in conjunction with Allura Flex, again in the Brown Raw Timber colourway, to create separate work and meeting/breakout zones. Forbo's range of Tessera carpet tiles combine well with Allura Flex LVT, as the same adhesive can be used during installation, which means there is no need for transition strips, enabling a seamlessly integrated flooring design.
