

Gannat nursery school

The Eugène Bannier nursery school in Gannat recently underwent interior renovations designed to provide its youngest pupils with a comfortable and suitable learning environment. To meet the specific needs of this school, different floor coverings were installed. Sarlon trafic 15 dB was chosen for its acoustic performance, which reduces footfall noise and creates a quieter atmosphere conducive to concentration. Modul'up compact can be installed quickly and without adhesive, while guaranteeing high resistance for high-traffic areas. Finally, Eternal, which is robust and easy to maintain, is ideal for spaces used daily by young children. In total, nearly 1,000 m² of flooring was installed to bring this project to life.

Project name	École maternelle de Gannat
Building Contractor	Mairie de Gannat
Architect	Bruno BRUN
Photographer	Sylvain JOUVE
Location	Gannat (03)
Date of completion	2025
