

Gefiscal

Gefiscal has undergone a remarkable transformation, shifting from classic porcelain tiles to a modern, elegant, and innovative design. This change marks a new era for their offices located in the heart of Madrid. The goal was to replace the traditional appearance with a contemporary aesthetic, leading to the installation of a cutting-edge design from the new Marmoleum Solid collection. The office now features a seamless blend of modern design and functionality, with the flooring complementing the space's tones while adding a distinctive touch with the Orange Shimmer details. This unique design choice not only enhances the visual appeal but also emphasizes sustainability and durability, key aspects of Marmoleum that contribute to the overall well-being of employees. The result is a stunning and practical workspace where the combination of innovative design and sustainable materials supports a healthier and more comfortable environment for daily activities. Gefiscal's office transformation is a testament to how thoughtful design choices can elevate both the aesthetic and functional aspects of a workspace.
