

GetResponse, Gdańsk, Poland

GetResponse is a company that provides the highest quality solutions for online marketers. In the company's headquarters, located in the modern Arkońska Business Park office complex in Gdańsk, Poland, Forbo Marmoleum Modular tiles were installed. In the interior, designed by architects from Tabanda, one of the most powerful accents is the floor. It determines individual spaces: office space, kitchen, leisure zone, conference room and reception. A different set of Marmoleum tiles colors was chosen for each room to influence the well-being of employees and office guests. Dynamic and sunny colors in the kitchen, grey and black in the conference room and greens in the relaxation room.
