

Golden Jubilee Hotel

Sitting on the banks of the River Clyde, the Golden Jubilee Conference Hotel (GJCH) has recently been refurbished to a create hygienic, neutral and relaxing environment for guests. Designed by SPACE Solutions, Forbo Flooring Systems' Allura Luxury Vinyl Tiles (LVT) were specified to fulfil the cleanability and design requirements set by the hotel. The GJCH provides accommodation and conference facilities in the centre of Glasgow and sees a range of guests, from hospital staff and pre/post-operative patients to conference goers and more. As such, it was important that the rooms could satisfy the needs of every guest. SPACE Solutions was tasked to refurbish the 53 rooms, prioritising hygiene and comfort. Gillian Ralston, Senior Architect at SPACE Solutions spoke on the brief they received, saying: "With this project we wanted to create a welcoming, warm and inviting setting, with easily cleanable furniture and flooring. To make this happen, we had to design the rooms in a way that would minimise the risk of contamination for not only the guests, but also the staff who have to clean the rooms after a stay. However, we had to do this without compromising on the aesthetic value of the rooms. That's why Forbo's Allura LVT was perfect for this project." Forbo's Allura Decibel was specified in the Seagrass Anthracite and Light Grey Seagrass colourways, which both have a similar patterning. As well as this, the grey and green hues matched some of the design inspiration Gillian took from the surrounding environment. Gillian continued: "We chose Allura as it was available in designs that matched the scheme we had in mind, whilst also being easy to clean, fulfilling the hygiene requirements, and providing underfoot comfort. We also specified the Decibel format, which helps to reduce impact sound by 19 dB – an important factor for a hotel, where people expect a good night's rest!" The Golden Jubilee Conference Hotel won 'Commended' in the Forbo Escapes 2021/22 competition.
