

Golfclub Rijk van Margraten

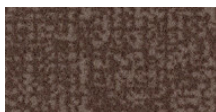

For golf course "Het Rijk van Margraten" in Limburg the Netherlands, quality and hospitality comes first. You can enjoy beautiful surroundings, a relaxed atmosphere and a challenging golf course. The clubhouse of the golf course was completely renovated at the beginning of this year. The clubhouse is divided into a reception, golf shop, lounge and restaurant. The restaurant and lounge are stylish and inviting to sit down, eat or enjoy a drink. From the restaurant you have a fantastic view of the golf course. The clubhouse is accessible for both golfers and non-golfers. Acoustics, durability, ease of maintenance and an attractive appearance were the starting points in the choice for the floor. The choice for Flotex was quickly made. There is a combination of Flotex planks, sheet and tiles in beautiful natural and grey shades such as Bamboo, American Wood, Cocoa, Silver and Zinc, all of which blend together nicely and seamlessly. In addition, the use of different colours and patterns creates a clear distinction between shop, restaurant and walkways. The choice of colours for the walls, ceilings and floor are nicely matched to each other and give the entire clubhouse the desired atmosphere.
