

Goudse Waarden

At the educational institution De Goudse Waarden, students from 12 to 18 years old from the Gouda area get the opportunity to acquire knowledge and skills in different practical subjects like automotive engineering and care & welfare. For this new location, Forbo's Design Service has created the floor design with 4 different shades from the Marmoleum Modular Shade collection.

In one large hall, several learning areas were created. The floors had to support the lanes and study places and give some intimacy and uniqueness to the further sterile spaces. This was achieved by working with Marmoleum Modular in soft tone on tone colors with an "at random" pattern.
