

Groupe scolaire et périscolaire, Wingersheim-les-Quatre-Bans

The architect of the Wingersheim-les-Quatre-Bans school and extracurricular group project has trusted Forbo Flooring Systems to choose flooring. He chose to combine the products of the Marmoleum range and Flotex. Marmoleum is a flooring known for its natural composition, aesthetics and excellent performance. The flotex is a flocked textile flooring known for its acoustic properties, brand comfort and ease of maintenance. The combination of the two products with many patterns and colours offers a unique rendering.

Project name	Groupe scolaire et périscolaire
