

**Grow Medical clinic**

Grow Medical is a family orientated GP clinic in Sherwood Brisbane which selected Forbo Flotex tiles and Sphera homogeneous vinyl as their floor coverings of choice. A holistic approach to health and excellence in care is the focus of the clinic and reason why only products proven to benefit the interior space and human health were sourced. Flotex is well known for providing healthier indoor air quality for patients and staff as dirt and allergens are easily removed by vacuuming. Forbo Sphera Energetic homogeneous vinyl flooring was used in the treatment rooms for its functional properties while challenging traditional flooring design. Sphera combines solid color with colorful accent chips that create an integrated room design, linking joinery, walls, floors and furnishing.
