

Gwangju Institute of Science and Technology

The Gwangju Institute of Science and Technology in Korea has many windows in the wall and ceiling to allow the light enter the rooms which gives a bright and spacious look and feel. On the floor a combination of Flotex colors and designs has been installed. Different designs are applied for different spaces, to part the different areas. Flotex is not only a comfortable floor, it also is very hygienic, durable and sound absorbing.

Project name	Gwangju Institute of Science and Technology
