

FLOORING SYSTEMS

creating better environments

The architect in charge of the hotel project, the team trusted Forbo Flooring Systems to choose the flooring. He has selected the Flotex product, a well-walked, flaky textile flooring known for its acoustic comfort and ease of maintenance. This floor is ideal for high-traffic areas such as hotels. The selected products are based on the Flotex Vision floral collection. This one offers a selection of eight original floral motifs, ranging from abstract to graphic flowers and offering a great combination of colors.
