

Hakuhokai Tokyo Spine Hospital

Hakuhokai Tokyo Spine Hospital, located in the centre of Tokyo and with a total of 78 beds and floor area of 5,100 m2, specialises in spine surgery. Most parts of the hospital are carpeted, and Flotex was chosen to combine cleanability and design. Flotex has been tested for wheelchair and bed mobility and has been well received by patients. Safestep R11 was chosen for the kitchen and other wet spaces, Colorex for the operating theatre and other Forbo flooring products for most of the hospital floor.
