

## Hartlepool Maritime Experience

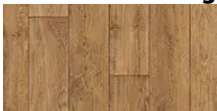

Naturals, a Flotex digital design by Forbo Flooring Systems, has been used to recreate a ship's deck in the Children's adventure centre at the Hartlepool Maritime Experience. The museum is a re-creation of an 18th century seaport and is home to Europe's oldest floating war ship, HMS Trincomalee 1817. It refurbished the children's educational room and followed the nautical theme complete with masts and sails, and finished off with the realistic Flotex digital floor covering.

Location

Hartlepool, United Kingdom
