

Henneman van Hees Ortodontisten

With the transformation to oral care practice, this beautiful building from 1900 was brought back to its original state and now fits nicely into this historic part of Breda. A hypermodern practice has been realized on the ground floor. On the floor is a freshly colored Marmoleum Striato that connects all the spaces. At the reception desk, the sterilization and the entrance to the staff and meeting room, the red, blue and yellow color in the floor covering is returned.
