

Hessenwaldschule

The Hessenwaldschule is a comprehensive school in Darmstadt, Germany. Throughout the school, Marmoleum Concrete flooring in color 3709 silt is laid on an area of 5,000 m². Marmoleum Concrete 3709 is a single-colored floor covering with fine color nuances, but still has a monochrome effect on the surface. In the central hall a relax island has been created where students can hang out during breaks. Our flocked textile floor covering Flotex Calgary s290015 azure has been installed in this space, which offers a nice and comfortable contrast with the uni Marmoleum floor.
