

Hospital of Loroux Bottereau

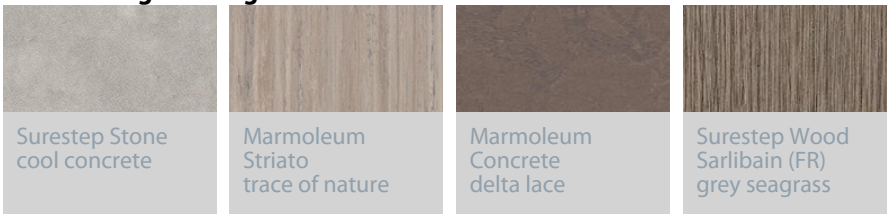

© Guillaume SATRE photographe / AIA LIFE DESIGNERS

The hospital of Loroux Bottereau in France chose Forbo Flooring for the renovation of its floor coverings. The hospital decided to choose Marmoleum flooring and Surestep safety vinyl flooring, which are modern and sober. Marmoleum, the natural linoleum flooring, is compact, acoustic, resistant and of high- quality, which is perfect for the high traffic of the hospital. Surestep Wood safety flooring is resistant to hospital tasks and is ideal for wet rooms because it offers excellent slip resistance. Moreover, it creates a welcoming atmosphere thanks to its trendy design.
