

Hotel ILF

A perfect transformation of the interior thanks to flocked flooring Flotex Planks. In the reception, lobby, restaurant and corridors of the Ilf Hotel, the floor was replaced with a functional flocked vinyl Flotex. Due to the high traffic, the investor was looking for a durable covering that is attractive in design, easy to install and maintain. The Flotex Planks modular system offers quick installation with minimal cutting waste. The selected designs from the Concrete range fit perfectly into the contemporary interior and elegantly transform it into a modern and timeless one.
