

Huisartsenpraktijk Meuffels

The beautiful transformation of doctor's practice Meuffels in Weert, The Netherlands, has been awarded with an architecture prize. A new world has been created within the contours of the building that dates from the early 1980s. The design is surprising, original, friendly and functional. It is incredible how much has been realized on relatively few square meters. The custom made furniture is equipped with Forbo Furniture Linoleum, and combines beautifully with the uni Marmoleum Solid floor coverings.
