FLOORING SYSTEMS

creating better environments

Hôtel Trinquet Berria Hasparen

The architect enlisted the help of Forbo Flooring Systems to floor the rooms and corridors of the Trinquet Berria Hotel. He turned to the Flotex range, a flocked flooring textile known for its acoustic properties, walking comfort and ease of maintenance. The Flotex Vision and Metro flooring sets offer elegant, floral patterns that make the floor unique. The Flotex floral vision product offers a wide range of colour combinations and floral patterns that can be displayed in each room and create a warm atmosphere.
