

ISARA engineering school

ISARA, located in Lyon, is an engineering school specialised in agriculture, agribusiness and environment. ISARA entrusted Forbo Flooring Systems with the choice of its floors. The school opted for Flotex flocked flooring, an exclusive flocked floor covering known for its acoustic properties, walking comfort and cleanability. ISARA chose for our Flotex by Starck design, designed by the designer Philippe Starck. The Starck flooring collection features unique and innovative patterns.
