

Improve International

As part of Improve International’s expansion, the company has invested heavily into enhancing the training facilities at its Swindon site. Adding two surgical wet-lab training theatres and a radiology suite, there was a keen focus on branding, comfort and sustainability across the new spaces. Kerr Office Group looked to meet this brief using a range of Forbo’s flooring solutions, including its Marmoleum, Allura LVT and Surestep safety vinyl. As a leading provider of veterinary training, Improve International has been delivering courses to industry professionals since 1998, ensuring they have the skills and confidence to carry out compassionate animal care. With two UK-based locations, in Sheffield and Swindon, Improve International has a range of facilities to perform practical and attendance courses across a broad range of specialities.
