

Innovative Joinery

Tables to play at. Tables which are easy to clean, comfortable and practical to sit at, with tabletops that are not noisy when playing with eg LEGO®! This was the inquiry for the joinery Stagetorn from the customer, a larger out of school Club. "As finish for the table tops we suggested Furniture Linoleum because it is easy to clean, reduces noise and last longer compared to lacquered surfaces" cabinet maker Peter Kyster explains. The Joinery Stagetorn wants to promote the professional workmanship with creative solutions – "we enjoy being challenged on our skills and ability for innovation". The rounded tables are assembled without screws, only with pins. They are made of 18 mm birch veneer – but easy to move. They are on wheels!
