

Inspiration Factory IDuMM Design

The old Emmen dairy has been transformed into a beautiful showroom and inspiration factory of IDuMM Design. A fantastic creative place that IDuMM fits like a glove. The whole restyling is, - how could it be otherwise, done by themselves. Design and interior design is in Marcel Vroling's blood, as you can clearly see from the attractive interior design of the showroom. They have tackled everything, from design to realisation, from toilet to kitchen and from floor to ceiling. Of course a floor is part of the design of a room. Marcel has opted for the quality and stylish, timeless character of Allura. Throughout the entire showroom you can see 8 different designs, wood and stone, not from real to distinguish, laid in different laying patterns and formats so you can see the endless design possibilities.
