

Iona presentation college

Iona Presentation College is a four-storey, split level learning centre located in the centre of Mosman Park. The learning centre provides contemporary learning environments to cater for the existing student population with a core focus on arts, design and innovation. They wanted to reflect modern-day learning by incorporating high-quality products that were practical, durable and stylish. With this in mind, Forbo’s Allura LVT in Hungarian Point design was specified. In the laboratories and practical classrooms, Forbo’s Step safety wood flooring was chosen due to the high spillage risks in these areas.
