

Isala healthcare facility

From August 2013 Zwolle has the largest top clinical hospital in the Netherlands. With the new construction of the Isala Clinics, a healthcare institution has been built with a floor area of 110,000 m², nearly 900 beds and about 5,000 employees. All developed in an organic, colorful design that has been implemented in detail in exterior and interior. The basis: a sustainably built "cure house" in form, function and environment that improves the recovery of patients. Forbo has contributed with nearly 90,000 m² of flooring. Several Forbo flooring products have been applied in various colours and designs; Marmoleum, Colorex, Surestep, Eternal and Safestep. Also some customer specific floors have been made.
