

Järveküla Kindluse School

The Järveküla Kindluse School is a new school near Tallinn. The school's classrooms and educational activities are gauged to the development and support of the students' creativity, cooperation, entrepreneurship and self-management. The Marmoleum and Flotex HD digital print floor coverings installed in the school stand out for their visual identity. Marmoleum Splash is the perfect floor to make a subtle statement. From a distance, Splash appears light grey with a slight nuance in tone, yet from up close, it is an overall light grey with hints of surprising colors peeking through. In many rooms, the Splash colour is used as a base colour and also acts as a connector between the more classic Marmoleum Real and Fresco visuals. A Flotex HD digital print floor is used in the larger rooms: a floor that really makes a statement and at the same time provides a comfortable environment.
