

Jux & Tollerei Parsdorf

The indoor playground "Jux & Tollerei" is since 2019 an ideal destination in all weather conditions. The architects of the STUDIOSOKO GbR from Munich created a paradise for children from wave slides, trampolines, bouncy castles and many other attractions. On an extra area, an indoor soccer field was created, which was equipped with Flotex by Forbo in various shades. This textile floor covering is very hard-wearing and offers the children a pleasant foot warmth. The mascot "Gustav" was not missing in the interior design. Therefore, it was transferred to the textile floor covering by means of digital printing and thus integrated into the room concept - mats, inserts or stickers with the logo become superfluous. The interior creates a uniform appearance in coordinated colors, which can also be found in the entrance area of the changing rooms. Here Marmoleum came in a blue color used. The climate-neutral floor covering scores with positive features such as easy care and longevity.

Project name	Jux & Tollerei, Parsdorf
Location	Parsdorf, Deutschland
Date of completion	2019
Architect	STUDIOSOKO GbR, München
Building Contractor	Fritz Eichbauer Bauunternehmung GmbH & Co. KG, Parsdorf
Installation by	Urban & Hörtreiter GmbH, Unterhaching
