

KIKUMOTO Preschool

The theme of the preschool is “a space where children can think for themselves and let their imagination run wild” and “a preschool that is like a museum.” Marmoleum is a natural and safe material for areas used by children. Its many colour variations make it suitable for a floor plan with different colours for each location, such as the classrooms, the entrance and a picture book corner, so that children can recognise these places by their colours. The preschool was very satisfied with the results.

Location	Niihama-shi, Ehime, Japan
Architect	Atelier9 Architects and Associates, JAKUETS
Interior architect	Igarashi Design Studio
