

Kindergarten Ostrava Svinov

The colorful kindergarten is designed for two classrooms of children. The building is built around the atrium. The classes have a direct entrance to the outdoor terrace, designed for both games and outdoor lessons. The used color linoleum Marmoleum define the indoor building sectioning and individual departments. Colorfulness is also underlined by other used interior elements such as tiles, doors or furniture. Linoleum create a functional, easy-to-maintain surface that is permanently antistatic and naturally antibacterial.
