

Kindergarten and primary school Moscow

When KROST company first started to work on the concept of this trend kindergarten and primary school they made a contest among the architect for the best project. Forbo worked in cooperation with the designer team of KROST company. The result of the cooperation is this playful educational center with Marmoleum flooring installed all over the building. Marmoleum is the durable and sustainable flooring that suits perfectly for the place where children spend half of their lives.

*The white Marmoleum color that is visible in the floor design is no longer in collection. For alternatives visit the Marmoleum Marbled collection .
