

**LFB Biomedicaments**

LFB Biomedicament is a pharmaceutical group specialized in biomedicine, to treat serious and rare illnesses. In France, LFB Biomedicaments is an important industrial actor of health, having four bioproduction sites. For the realization of the Headquarters' offices of the Group LBF, the Forbo Allura flex floorings have been selected. So, these offer a great charm to various spaces through the very realistic wooden décor. Finally, Allura Flex's technical properties such as acoustic comfort (14 dB) provide great satisfaction for users.
