

**Lannion university cafeteria**

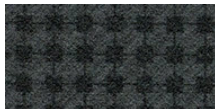

The cafeteria at the IUT Lannion in Côtes d'Armor (22), part of the University of Rennes, has decided to renovate its premises. For its floors, the university chose Forbo Flooring to give them a facelift. Two patterns of Flotex planks were installed. The first, in imitation wood, has a warm, friendly feel, while the second, in a dark colour, gives the cafeteria an elegant, design look. Thanks to its acoustic properties, technical performance and ease of maintenance, Flotex is the perfect flooring for dampening ambient noise in these areas. Its planks format means it can be installed efficiently and with a designer look.

Nom du projet	Cafétéria IUT Lannion
Architecte	LAAB Architectes, Lannion (22)
Entrepreneur (général) de référence	IUT Lannion - Université de Rennes
