

## Latvijas Lauksaimniecības universitāte

The main building of the Agricultural University of Latvia is located in the large 18th-century baroque castle of Jelgava. Sphera Energetic was chosen for the university's hallways because of the performance and durability of this homogeneous vinyl flooring. The Sphera Energetic range brings new dynamics to homogeneous vinyl flooring. Sphera Energetic offers a playful combination of a coordinated colour palette and designs with different intensity and scale, making it fit for purpose for any function or intensity of use.

Adrese	Jelgava, Latvia
Arhitekts	Konvents SIA
Fotogrāfs	Jana Leite
