

**Laufhaus Oderwitz**

The sports shop "Laufhaus" in Oderwitz for healthy running, natural running and Nordic walking was opened in May 2019. In addition to the appropriate sports equipment for running, the product range includes a wide range of courses and a video analysis of individual running behaviour. This takes place on a running course separated by aluminium profiles. In order to create an outdoor experience in the store, various elements made of wood and stone were integrated into the room concept, such as wooden shelves and benches in natural stone look. The lines of the flooring and the harmonious colour gradient optically enlarge the room and give it a certain dynamic. The choice of colours for the walls and the floor support the modern character of the shop fittings. Flotex by Starck was chosen for the floor. This design by the French star designer named Twilight, reflects an interplay between light and shadow, reminiscent of a run through the forest. It is one of Philippe Starck's favourite designs. In addition, the flooring scores points not only for its good and non-slip walking feel, but also for its noise reduction and easy and good cleaning.

Project name	Laufhaus Oderwitz
Location	Oderwitz, Deutschland
Date of completion	Mai 2019
Installation by	Torsten Sikora, Oderwitz
Photographer	Matthias Groppe, Paderborn
