

Leeds City Museum

The ambitious project to turn Leeds' old Civic Theatre into an exciting new state-of-the-art museum for the city provided Forbo Flooring with one of its most challenging projects to date. The Leeds City Map is one of the largest, most complicated bespoke designs ever produced in Marmoleum®. Using its unique Aquajet technology Forbo was able to create the map spanning 17.25 metres at its widest point and 15.24 metres in depth.

Location	Leeds, United Kingdom
Architect	Stephen March & Sandra Elms, Redman Design, Leeds
