

Level 10 & 11 Display Suites, 111 St Georges Terrace, Perth

111 St Georges Terrace, Perth is a substantially refurbished high-quality office building in the hart of Perth. Allura Flex luxury vinyl tile Hungarian point planks are installed to create a spacious and modern looking interior.

The Hungarian point is a classic design for parquetry floors where small individual planks are cut at 45 degrees angle that allows realistic herringbone and chevron designs to be created with ease. Allura Flex has outstanding acoustic performance making it an ideal option for multi-level buildings.
