

Light Guide Optics International

Light Guide Optics International is a leading European developer and manufacturer of optical fibres used in medical, industrial, and research applications. The company's facility in Līvāni, Latvia, underwent a comprehensive renovation, incorporating sustainable and innovative interior materials to reflect its forward-thinking ethos. The facility's design includes modern, flexible workspaces that foster collaboration and productivity. Forbo's flooring solutions were selected to enhance both aesthetics and functionality. High-performance products, including Colorex and Sphera, ensure a durable, clean environment suitable for highprecision work. This thoughtful approach to interior design reinforces the company's reputation as a cutting-edge, environmentally conscious organisation.
