

MAME, Tours

For the MAME project, the architect called on Forbo Flooring Systems to choose the flooring. She selected The Flotex product, a high-quality, flocked textile flooring. It is an easy-to-clean flooring, walkable and known for its acoustic properties. The design chosen is part of the Flotex colour tiles collection. Flotex colour tiles are ideal for imagining creative design effects. This collection comes in a multitude of shades, making it easy to combine colours and create a unique and trendy floor.
