

Makosh Office

In Makosh office a combination of Marmoleum Real and Flotex flooring was chosen to create a modern office that offers ideal sustainability and sound absorption. Natural Marmoleum flooring is used for the durability of the hallways, while Flotex in sheets and planks is applied to create a comfortable and quiet atmosphere in the work areas. Complete Step, a special flooring solution for stairs, ensures safety thanks to its contrasting nosing and additional sound absorption of 17 dB. This comprehensive solution makes the office resistant to castor chair, easy to wet clean, and visually cohesive from the entrance to the offices.
