

Masterpieces | Schools for wood and design

The educational institution “Schools for Woodworking and Crafts” in Garmisch-Partenkirchen offers a total of 150 training and further education places in four school branches and specializes in training the carpentry trade. Specialists are trained who combine technical skills with creative thinking. Current masterpieces and projects are presented on technical school days. Visitors can experience innovative pieces of furniture, creative design ideas and practical crafts up close and be inspired by the variety of design approaches. Some of the furniture was covered with Furniture Linoleum. The sustainable material is ideal for furniture surfaces and offers a variety of practical and aesthetic benefits. Furniture linoleum is made from natural raw materials, which gives it a warm, matt and pleasantly velvety feel. The material is also durable and easy to care for.
