

MeSun Health Services

MeSun Health Services Inc. has expanded its Lawrenceville campus to include a 100-bed nursing and rehabilitation centre. The building houses the skilled nursing facility and includes large public areas, clinical, support and administrative areas, private patient rooms, flex patient rooms and activity spaces. The architect has been specifying Flotex for more than 20 years. He specified Flotex in a healthcare rehabilitation project in 2005 and those floors still look amazing, the quality surpasses all traditional carpets. Due to the needs of Senior Care communities, Flotex was chosen for its unique characteristics, such as quiet underfoot, slip resistant, hygienic and impervious to water.
