

Metro Boutique - Retail space Shoppi Tivoli

Description: Metro Boutique is a Swiss fashion retailer with the largest selection of international premium and exclusive niche brands in women's, men's and children's clothing. Metro Boutique has been keeping up with the times for over 30 years and offers an exceptional shopping experience with a unique store design. When renovating the store in Shoppi Tivoli in Spreitenbach, the client opted for Allura Puzzle from Forbo to avoid closing the store. The installation of around 1,500 m2 was carried out within just 7 days during ongoing operations without any major closures and without creating any dust. The store was open throughout the entire period.
